

Assembly Instructions: 0881-3P

IMPORTANT:

- ALL INSTALLATION WORK SHOULD BE DONE BY ACCREDITED PROFESSIONAL.
- SHUT OFF POWER SUPPLY AT FUSE OR CIRCUIT BREAKER!
- USE ONLY THE SPECIFIED BULBS. DO NOT EXCEED THE MAXIMUM WATTAGE!

For Customer Service, please contact the place of purchase.

PREPARING FOR INSTALLATION

Carefully remove the new fixture from the carton as well as the yellow bag that holds all of the parts. See the important notes above. Shut off power at the circuit breaker and remove old fixture from wall, including the old mounting strap.

1. From the parts bag remove the mounting strap assembly. One end of nipple (F) should be attached to mounting strap (A) with washer (C) and hex nuts (D) in place. The other end should have canopy loop (H) attached. Attach mounting strap (A) to the junction box using mounting screws (B) and a screwdriver. Tighten securely. Pull house wires through the center of the mounting strap. Unscrew canopy loop collar (I) from canopy loop (H). Pass canopy (G) over the mounted canopy loop to test the height. Approximately half of the canopy loop's exterior threads should be exposed, and the canopy loop collar should fit snugly onto the canopy loop. Remove canopy (G) and adjust the height of nipple (F) and canopy loop (H) until the desired height is reached.

ASSEMBLING THE FIXTURE

2. Pull fixture wires from nipple (N) and push through top loop (L). Pull the wires until taut. Thread the top loop (L) onto nipple (N) of the fixture frame. Tighten the top loop until snug.

3. Measure to determine the correct length of chain needed for proper hanging height. If necessary, use a pair of pliers to open and remove any excess chain. Attach one chain connector (K) to each end of the chain (J). Attach chain connector (K) and chain (J) to top loop (L). Feed the fixture wires from nipple (N), top loop (L), chain connector (K), and the chain (J) (every three links or so), pulling the wires until taut. Use the remaining end of the chain with chain connector (K) to attach the chain (J) to canopy loop (H). Close the chain connectors to secure. Feed wires through the canopy loop (H) and canopy (G). Slide canopy loop collar (I) and canopy (G) down onto the chain/wires. Pull the wires until taut. Trim the wires to the desired length plus 8 to 10 inches.

CONNECTING THE WIRES

4. Have an assistant support the fixture weight while completing the wiring. Attach the fixture's wires to the house wires which were pulled earlier from the junction box through the mounting strap (A). Connect black to black (transparent wire with black inner thread or smooth); white to white (transparent wire with white inner thread or ribbed); ground to ground (green, transparent wire with green inner thread, or copper). Twist the ends of the wire pairs together, and then twist on a wire connector. Make sure all twists are in the same direction. If there is no ground wire (green or copper) coming from the junction box, locate ground screw (E) on the mounting strap and wrap the fixture's ground wire around the green ground screw (E). Use a screwdriver to secure ground screw (E) onto the mounting bracket. Tuck all wires neatly into the junction box.

FINISHING THE INSTALLATION

5. Push canopy (G) up to the ceiling and slide canopy loop collar (I) up beneath the canopy. Tightly thread canopy loop collar (I) onto canopy loop (H) to secure canopy (G) in place.

Install light bulbs (not provided) in accordance with the fixture's specifications. Do not exceed maximum recommended wattage.

Your installation is complete. Turn on the power and test the fixture.

How to Identify the Fixture's Wires

Hot	Neutral	Ground
Smooth	Ribbed	Bare Metal, Green, or Green Inner Thread
Black	White	
Black Inner Thread	White Inner Thread	

CLEANING TIPS

Treat the fixture gently! Regular cleaning will reduce the need for deep cleaning. For regular cleaning, turn off the light and wipe down the fixture with a clean lint-free cotton or microfiber cloth. Never spray cleaner directly onto the fixture. For deep cleaning, turn off the light and remove the glass prior to cleaning. Hand wash glass with warm water and mild detergent. Dry with a lint-free or microfiber cloth.
